

Workshops running in September and October 2021

This summer, we are embarking on a UK wide song-writing project to support reconnection and amplify voices of people from any generation or walk of life.

We will be delivering 2-day workshops in 8 locations across the UK, celebrating people, diversity, inclusion and connection.

We would like:

- To empower individuals to raise their voices through music
- To support individuals as they reintegrate into the community
- To promote socialisation, across backgrounds and generations
- To offer training and education in using music for mental health and wellbeing
- To promote a network of musical connection

This project will demonstrate the power of music in our countries healing and future prosperity, further uniting us through shared musical experiences.

Project Information

Who we are?

Intergenerational Music Making (IMM) is a pioneering UK based not for profit organisation working to advance wellbeing and social cohesion through musical creativity. Our mission is to bridge the gap between people and generations through music, reducing loneliness and isolation, supporting those living with dementia and improving the mental health and wellbeing of both the young and the old.

In December 2020 we launched '**Together with Music**, a virtual, intergenerational programme that connects schools, community groups and creatives to their local care homes and older people through music. An innovative partnership between **Care England** and **Intergenerational Music Making (IMM)** is working to connect the two parts of our communities that have been most effected by the pandemic.

Together with Music now has over 850 members UK wide and, is actively engaging with over 32,000 individuals through our digital platform.

Why this matters?

As we now move out of Covid, it is vital that we take steps to rebuild in a different way, a more inclusive and creative way. The song-writing project will span the whole of the UK linking in with TwM members in care homes, hospitals, schools, community groups etc to get involved in these bespoke workshops. The workshops will be co-produced by communities, bringing people together from different backgrounds, generations and ethnicities to explore and develop within the music. We want this project to promote the power of music in our countries healing and future prosperity, further uniting us through shared musical experiences.

- Bringing people of all background and ability together to celebrate music and life
 - Empowering people to use their voice to share their story
 - Reintroducing people into the power of music making
 - Encouraging local volunteers to support in the creation and facilitation
- Building stronger, healthier and more integrated communities through music and understanding

Day 1 – Training Workshop

Covid has highlighted the place that music and arts have within individual health and wellbeing and collective prosperity. Many music schools, conservatoires, colleges and music settings have seen an increase in students and young people wanting to explore how they can further train or adapt their learning within health and wellbeing.

The training session will run over the course of the day centred around intergenerational music making and community outreach. The workshop will be practical, identifying concepts surrounding music therapy, community music and music and dementia and workshopping approaches for using music to support vulnerable groups. We aim to inspire and equip young musicians, encouraging encourage the players to design and build their own 'music toolbox' understanding the rationale and clinical thinking behind music within health and wellbeing.

The aims are to:

- To empower young people in using their musicality to support their community
- To offer transferable skills and ideas to help players develop in the future
- To offer an understanding of intergenerational practice and how this can be adopted into their everyday work.
- To network and make connections
- To inspire players to work with more audiences across their communities
- To offer a greater, more in depth understanding of the place music has within personal and collective social health and wellbeing.

Maximum size of groups: up to 30

Open to:

- Youth choirs
- Youth community groups
- Schools/holiday clubs
- Young adult groups
 - Care Staff
- Local Youth Music Groups

Day 2 – Creative Workshop

The workshop will take place over one day, split into activity sessions that will encourage groups to come together in the music making. We will adopt a number of music activities such as improvisation, song collages and poetry to spark inspiration and conversation between participants. We want to use the power of music and song-writing as a vehicle into sharing of stories, culture and heritage - providing agency to feelings surrounding the pandemic and building strong connections and mutual respect and understanding between group members.

Moments will be captured (recorded) during the workshop, providing participants with the power and confidence to be a driving force in the creation of the music, telling their story and having their voice heard.

The aims are to:

- To promote access to music and connection to support individual wellbeing
 - Support groups in creating local connections with their community
 - Support those living with Dementia through music
- To provide a safe platform for stories to be shared and voices to be heard

Maximum size of groups: 60 participants

Open to/participants: Participants involved in Day 1 will be invited to the creative sessions and will be given opportunities to put their learning into practice.

Open to:

- Care Homes
- Sheltered Accommodation
- Local community members (we will be linking in with social prescribers)
 - Dementia groups
 - Older Choirs
